

Farm Seeding Machine for Rice Wheat Soybean Seeds Planting

YongXiang Industry Park, No.2 Development Rd.
Anlu City, Hubei Province, China
Hubei 432600
China

Phone: +8613128804218

YongXiang offers a combined 100L pneumatic seeder with Radar Sensor, Disc Ditcher with 7 Levels Depth Adjustment and Farmland Roller. This allows farmers to utilise the optimal time for sowing and benefit from saving seeds and improving high seeding production volume. For most farmers, sowing catch crops directly as they cultivate their stubble is the easiest approach, as it avoids an additional pass and reduces working time, effort and costs.
